Members Only firms up its alliance with X-charge · Jul 7, 2011

Members Only Software has been providing Accelerated Payment Technologies' X-charge payment app for some time. It's become our preferred means of integrating standards-compliant credit-card processing into our Windows and Web apps. Now we're offering X-Charge as an option to organizations even if they don't use Members Only. X-Charge's ability to store repeat customers account numbers offsite relieves you of an enormous risk when storing card number for re-charging. Talk to us about integrating X-Charge into your workflow!

Linking MailChimp to Members Only · Jun 23, 2011

Members Only Software can now provide your communications team with seamless integration between the popular MailChimp email-marketing application and your CRM. So you can use the Chimp to mail to your members and donors without the tedious and error-prone task of extracting and uploading data.

Members Only WebStore Ready for Prime Time · Jun 10, 2011

The completely re-crafted Members Only WebStore provides a total online shopping experience for your community, tightly integrated to your Members Only CRM or Association Management System. Manages member/non-member pricing, quantity discounts, downloadable products. And social links on every product make sure your users can share out any items that interest them.

Online Event Registration gets a Google FaceLift · May 15, 2011

This month we're proud to announce the availability of our Online Event Registration Portal. We've re-engineered the entire Event Registration mini-app in Google Web Toolkit, to provide a fast and responsive experience for your users.

Members Only Software builds integrated software applications for the non-profit, trade association, think tank, and YMCA communities.

Members Only Software provides custom Windows or Browser-based software development for CRM, financial, and e-commerce applications.

Members Only Software offers consultation and services to help organizations grasp PCI requirements and manage credit cards securely.

June Tip:

Building Session Tracks in Members Only Meetings

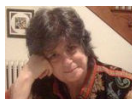

The Session Setup in the Members Only Meetings and Events module lets you perform a variety of tracking, pricing and inclusion tricks. For example, you might want to put three educational sessions in a special Cloud Computing track, but still allow participants to register for each individually. Here's how you can do it. [Learn more:](#)

There's lots more tips in the resources section! [More tips...](#)

June Featured Article:

What the heck is the Google Web Toolkit?

(June 6, 2011) Our marketing director Doria Howe sat Members Only Software president Michael Stein down to finally get a layperson's explanation of the Google Web Toolkit. What is this new development tool everyone is so excited about, and how does it help our users? [Find out here!](#)

Members Only puts you on the path to PCI compliance

Members Only and X-Charge: A PA-DSS Payment Solution

The major credit card brands are demanding merchant account holders get in line with their evolving PCI data security standard. One way to ease your path to compliance is to use a payment solution that's already been deemed secure by the PCI. That's why Members Only now provides CAMCommerce X-Charge at the heart of its payment strategy. [more...](#)

Believe it or not -

more than half of all credit card thefts involve employees or business partners.

83% were not technologically sophisticated.

66% of security breaches involved data the victim did not know he had on his system.

87% were avoidable through the imposition of reasonable controls.

Do you have controls in place?

We can provide the services you need to assure compliance with the PCI Security Standard.

Sherry Turkle on our relationships with machines and with each other. A very worthwhile 20 minutes.

06/23/2011 - Is Online Social Simulation Giving you Popcorn Brain?

This amusing little article from CNN is not the usual link fare here - but I suspect it is true. When your first urge on seeing a gorgeous sunset is to update your status, something's gone wrong. These researchers claim too much online stimulation actually affects your neuronal structure.

06/06/2011 - How the iPhone changed Smartphones forever.

An insightful piece by Dan Frommer in Business Insider that looks at the half-dozen separate innovations, in the spheres of technology and business model, that made the iPhone such a game changer.

06/03/2011 - Microsoft Preview of Window 8

This little video from the folks in Redmond shows the impact that smartphone and tablet OS concepts have had on the designers at Microsoft. And hints that web-app architectures are poised to replace the old idea of desktop software.

06/01/2011 - Five Technologies that will Shape the Web

IEEE Spectrum's take on how the web will change in the next several years - more video, more mobile, and more inanimate appliances!

06/01/2001 Social Media Strategies for Meeting Planning Professionals

Michelle Bruno offers a variety of ideas for the effective use of new media for promoting and enhancing your face-to-face meetings.

05/31/2011 - Emerging Technology: Credit Cards with onboard computers.

These are traditional mag stripe creditcards, but the onboard computer enables a slew of new security and convenience features, such as hidden account numbers, multi-account cards, and cards that can be turned on and off with a pin code.
